Experience

MJV Soluciones en Tecnología LTDA

Specialist-Technology Advisor / CLT

September 2021 - Present (2 years 1 month)

Rio de Janeiro, Brasil

I participated in the development of Banco Santander's vehicle insurance project called Auto-Compara using the following technologies: in the back-end Nestjs, in the front-end Angular, Ionic, RxJS, NGRX, Capacitor...

Since Feb 1st. From 2022 I have been working on the development of Banco Bradesco's insurance project called Bradesco Seguros using the following technologies: on the back-end Expressjs, on the front-end Angular, Ionic, RxJS, NGRX, Capacitor...

At Bradesco, agile methodologies (Agile) are adopted in order to optimize product creation and delivery...

MOZG Comércio e Desenvolvimento de Sistemas de Informática
Full Stack Developer

February 2021 - September 2021 (8 months)

São Paulo, São Paulo, Brasil

Always seeking my professional improvement, in 02/2021 I developed the following Stremio-Addon extension in Node.js for the Stremio platform using the Stremio Addon SDK, the project is publicly available on Stremio-Addon

I have been adopting new practices for container development using Docker with multiplatform support, I have also been developing improvements for MOZG's institutional website that uses Ruby/Jekyll and also adding deployments to the website's "Projects" menu, using methodologies such as

“(CI) Continuous Integration” according to repositories on GitHub, Bitbucket and GitLab and “(CD) Continuous Delivery” in several “(PaaS) Platform as a Service”, such as: Vercel, Netlify, Heroku, Google Cloud Platform

Recently I have been exploring the use of Next.js, according to the project present in the “Projects” menu on the MOZG website

SUPPORTCOMM S/A

Systems Analyst and Developer / PJ

July 2020 - November 2020 (5 months)

São Paulo, Brasil

I participated in the development of the ad-manager-api project, which was a back-end project for managing promotional campaigns, written in Ruby with integration to PostgreSQL and several dependencies such as puma, rack, sidekiq, sentry...

I participated in the development of the ad-manager-web project, which was a front-end project for managing promotional campaigns using React and various dependencies such as Redux, Material-UI...

I participated in the development of the ddvg-front-end project, which was a front-end project to display promotional campaigns for several cell phone operators such as Oi, Vivo, among others, using Gulp for front-end development, as well as Jenkins continuous integration tool capable of compiling projects and running automated tests whenever you commit to your code repository.

For the development flow, the use of Docker was adopted involving several dependencies such as Redis, RedisInsight, PostgreSQL, Adminer, pgAdmin, ruby:2.5.3, Node.js, also Jira in conjunction with Bitbucket or GitLab adopting the GitFlow methodology to the Git version control system and VS Code as an IDE

Fundação Carlos Alberto Vanzolini

Systems Analyst and Developer / PJ

August 2019 - December 2019 (5 months)

São Paulo, Brasil

I participated in the development of the Escola Digital project, which is a cultural and educational project developed as a technology for the front-end, React and several dependencies such as Redux, Webpack, Babel, among

many others, and as a technology for the back-end, PHP Laravel Lumen as a base for the use of REST APIs, also the use of the PostgreSQL database, also the use of ElasticSearch services for search engine processing, also the use of Redis services for background processing, also the use of Node.js for processing data

For the development flow, the Trello project manager was used in conjunction with GitLab, adopting the GitFlow methodology for the Git version control system and VS Code as the IDE.

CEREBRUM Comércio Eletrônico Ltda ME

Systems Analyst and Developer / PJ

April 2005 - August 2018 (13 years 5 months)

São Paulo, São Paulo, Brasil

This is my company, where in this period of 13 years as an entrepreneur and developer I highlight some passages from this trajectory

In the period between 2005 and 2008, the packaging management project was developed for Santim Artes Gráficas, also the real estate management project for Rarus Flats where Adobe Flex technology was used, also specializing in e-commerce, we developed on our own creation of websites and virtual stores using Coldfusion as a back-end language, serving several clients of different sizes, such as Oregon Scientific

In 2008, with the prominence of the Magento platform, I started to adopt the use of Linux Ubuntu as a PHP programming language, providing services related to the Magento platform where we serve several clients from different segments throughout Brazil, such as the Arca Center client, which is the company's virtual store. Igreja Universal is also the client Livraria do Senado, which is the Federal Senate's virtual store, among others such as Somos Todas Barbaras and Casa das Pedras Brasileiras and Charme d Laços and Salto e Sela and ...

I am the developer of a large portfolio of modules for Magento, serving hundreds or even thousands of customers throughout Brazil and abroad, providing high-level technical support and always a lot of commitment. Among the modules developed, I can highlight: Cielo, Braspag, Rede, Itaú, Bradesco, Banco do Brasil, Correios, Correios Exporta-Fácil, Jadlog, Jamef, Loggi, ClearSale, among others, all modules and their statistics can be seen by

accessing Packagist, by accessing the Catalog menu it is possible to discover or test the modules for the Magento platform that I developed

In the MOZG repository it is possible to view, in addition to the modules for Magento, some diversity of technologies, such as the use of Bash Shell Scripting, the use of Docker, the construction of applications on Heroku, among others...

Sombre Reptile

Programmer Analyst

October 2003 - July 2004 (10 months)

São Paulo, Brasil

I participated in the development of applications for the intranet and reformulation of the Institutional Website and Communications Portal of Petroquímica União located "PQU" at the Capuava Petrochemical Complex, in Santo André.

Símbolo Editora e Comunicação Integrada S/A

Junior Programmer Analyst / CLT

April 2002 - September 2003 (1 year 6 months)

São Paulo, Brasil

I participated in the development of a series of applications for internal and external use, all written in the Coldfusion language in conjunction with the SQL Server Database Manager

Among the external applications I will mention the Atrevida website and the subscription website.

A content manager was created for the DietaJá website with exclusive needs for the project.

PIC Projetos de Informação e Consultoria Ltda
